

PROFILE

I'm a full-stack software Engineer who loves building things for the web and learning about new web technologies. I also love contributing to open-source projects.

PROJECTS

hyoka [↗](#)

A fast and precise math expression parser and evaluator for JavaScript and Typescript. Available on npm and can also be imported directly into browsers via CDNs.

- Built expression parser and evaluator
- implemented the shunting yard algorithm for the parser in TypeScript.

GitHub [↗](#) npm [↗](#)

Gittz [↗](#)

A full-stack web app that consumes the Github API to display a user's profile and repositories and also allows users to search for other users. it also integrates with the Twitter API allowing users to share their projects on Twitter.
